ISABEL YOUNGS

izzyoungs@gmail.com | LinkedIn | Portfolio | GitHub | Washington, DC

SUMMARY:

Izzy is currently a Research Specialist at the Georgetown Massive Data Institute, where she collaborates in the development and execution of research projects that explore emerging technologies, administrative data, and public policy. Izzy is an experienced professional in interdisciplinary quantitative research, and she is eager to apply this expertise to support the public sector in effective and ethical governance practices.

EDUCATION:

Georgetown University, Washington, DC
M.P.S. (M.Prof) *summa cum laude* in Urban and Regional Planning, August 2021
Concentrations: Housing policy, data analysis, spatial analysis, quantitative methods

University of Nevada, Reno
B.A. *cum laude* in Political Science and Communication Studies, Fall 2016

PROFESSIONAL EXPERIENCE:

Georgetown University, Massive Data Institute, Washington, DC
Research Specialist, August 2021 – Present
- Conducts complex tabular and spatial data analysis in RStudio, utilizing fuzzy matching, machine learning, and various spatial analysis methods.
- Creates interactive and data-driven dashboard visualizations utilizing Esri and Tableau to inform data users on the utility and issues with various administrative data sources, primarily census data products.
- Manages dozens of grant deliverables related to data governance, administrative data linkage, population estimates methodology, and more.
- Consults local government officials on strategies related to population measurement modeling, data governance, and administrative data linkage for program evaluation and long-term planning.
- Presents high-level research findings and policy recommendations to funders, stakeholders, and the public through seminars, blogs, reports, infographics, and presentations.
- Coordinates coalition groups including the Census Products Alliance and the Eviction Data Coalition with the mission of engaging diverse and interdisciplinary communities around administrative data education and technical assistance.

Georgetown University, Massive Data Institute, Washington, DC
Project Manager, October 2019 – August 2021
- Served as an effective project and product manager across several projects, assisting Principal Investigators in completing grant proposals, developing budgets, and outlining work plans for deliverables.
- Reviewed applications, hired, onboarded, and supervised over one dozen research assistants for the unit and coached them on how to contribute to tasks that aligned with their interests, connecting them to growth opportunities relevant to their research interests.
- Coordinated program operations, performed project and product management tasks, and developed procedure standards and documentation in support of MDI's overall strategic plan.
- Monitored the staffing and financial components of research projects in a $2.9 million project portfolio to meet contractual and reporting requirements by various public and private funding entities.

Georgetown University, Global Cities Initiative, Washington, DC
Graduate Fellow, January 2021 – June 2021
- Developed an ArcGIS Urban model of the Friendship Heights area to simulate development proposals for a studio course.
- Performed a conditions assessment to identify the major opportunities for Georgetown to expand their support of spatial analysis and thinking.
- Authored a report on the obstacles and opportunities for expanding the use of GIS across the Georgetown campus based on conditions assessment and stakeholder engagement.

Georgetown Business Improvement District, Washington, DC
Data Science Intern, May 2020 – July 2020
- Analyzed location data and various demographic and business data from open data sources to assess Georgetown's retail and office market performance as well as visitor and local resident transportation behavior.
- Automated the collection and visualization of bikeshare utilization data which leveraged the Capital Bikeshare API endpoints and referenced the results into a Tableau dashboard.
- Designed, built, and launched Tableau dashboards to assess and visualize major financial trends in the Georgetown BID to contribute to economic development and COVID-19 recovery approaches.

Urban Institute, Office of Technology and Data Science, Washington, DC
Academic Intern, January 2020 – May 2020
- Conducted a field scan to synthesize case studies and scientific literature for a report on equity promises and Smart City technology programs in public administration.
- Wrote one dozen memos assessing various Smart City and equity initiatives around the country, comparing how public procurement and administration practices affected equity promises.
- Contributed to the development of a bias assessment tool by using R to spatially join points and polygons to census tracts, which automatically generates reports on the demographic bias of data sets.

The Lockard Group, Carson City, NV
Legislative Assistant, February 2019 – June 2019
- Developed and carried out a legislative agenda by lobbying state lawmakers, analyzing legislation, suggesting amendments, providing testimony, tracking bills, and writing reports.
- Built a broad legislative coalition through strategic partnerships to advance the legislative priorities of clients, including hospital worker protections, eviction record sealing, affordable housing development streamlining, a low-income housing database, tenant protection laws, and legislation increasing state contributions to the Low-Income Housing Tax Credit fund.

TECHNICAL SKILLS:
- Data wrangling and analysis with R (tidyverse framework)
- Spatial analysis and automation using ArcGIS Pro and R (sf framework)
- Data visualization and cartography with Tableau, Mapbox, ArcGIS Pro, QGIS, and R (ggplot)
- Programming in web-based environments such as Google Cloud Platform, Colab, and Jupyter Notebook
- Web design and documentation with RMarkdown, HTML/CSS, WordPress, and Google Sites
- 3D modeling in Sketchup and ArcGIS Urban
- Conversational in American Sign Language
